Elements of Arguments and Fallacies

1	Ad Hominem	Fallacy in which the arguer attacks the opponent instead of attacking the argument of the opponent (Elements of arguments, 2016).	("Common Fallacies in Argumentation", 2019)
2	Appeal to Popularity	Fallacy in which the arguer makes his point upon popular beliefs that are widely accepted (Elements of arguments, 2016).	(Ad populum, 2017)
3	Slippery Slope	Fallacy in which the arguer makes a chain of events that are highly unlike to occur if the first one does (Elements of arguments, 2016)	(Slippery Slope of Americans' Mindsets, 1970)
4	Tu Quoque	Fallacy in which the arguer argues because others do something, it is therefore acceptable to do (Elements of arguments, 2016).	(The 'Tu Quoque' Fallacy – Some more thoughts on Commission v Google, 2013)
5	Generalization	Fallacy in which the arguer asserts one conclusion on a general group (Elements of arguments, 2016).	(Hasty Generalization, 2019)
